SUPPLEMENTARY NOTE.—The foregoing list of American writers on subjects connected with Biblical Exploration, being a first attempt at such a collection, is necessarily incomplete; but it may furnish suggestive material for better work in the same direction. The attempt is to record under the name of each writer all the works and the articles which have appeared in reviews, magazines and other permanent volumes of periodical literature. Want of space forbids the insertion of a much larger list which might have been gathered from the columns of religious journals. The compiler will be grateful to any who will send him corrections or additions to this list for future use.

## IS THE CURRENT CRITICAL DIVISION OF THE PENTATEUCH INIMICAL TO THE CHRISTIAN FAITH?

BY PROF. WILLIAM HENRY GREEN, D. D., LL. D.,

Princeton Theological Seminary, Princeton, N. J.

---

THE OLD TESTAMENT STUDENT for May, page 259, copies a paragraph from the *Presbyterian Review* containing the following sentences:

"The analysis of the Hexateuch into several distinct original documents is a purely literary question in which no article of faith is involved. Whoever in these times, in the discussion of the literary phenomena of the Hexateuch, appeals to the ignorance and prejudices of the multitude, as if there were any peril to the faith in these processes of the higher criticism, risks his reputation for scholarship by so doing."

Two remarks are naturally suggested by these words.

1. Truth is to be accepted at all hazards. If the first six books of the Bible are really compounded of the several documents which the critics profess to discover in them, we must admit the fact and make the best of it. No doubt the Christian faith will survive, whatever happens.

2. Nevertheless there are good reasons why those who reverence these books as an integral portion of the inspired Word of God and who believe them to be a truthful and reliable record, should not be overhasty in accepting critical conclusions which are based upon and necessarily involve the opposite assumption.
